

SPA CHLORINE / BROMINE DISPENSER WITH POP FLOAT INDICATOR

Instructions for use:

1. Remove top middle cap from dispenser.
2. Fill in the dispenser with slow-dissolving chlorine / bromine tablets. (Never mix the two!)
3. Replace the top center cap and the dosing opening (see below table).
4. The center part of the dispenser will rise up to indicate that it is empty.
5. Take care to maintain a good water balance (adjusting the pH level) to ensure effective disinfection (contact your local dealer for information on the water condition.)

*For information, an additional hanging cord (included) prevents the dispenser from drifting.

WARNING: This dispenser is designed to be used only with slow dissolving chlorine/bromine tablets.

DO NOT MIX with calcium hypochlorite or other forms of concentrated chlorine or other chemicals. **FIRE AND/OR EXPLOSION MAY RESULT.**

Thoroughly wash the dispenser when changing chemicals.
KEEP OUT OF REACH OF CHILDREN.

NOTICE:

Weather conditions, frequency of use, water temperature and number of bathers can affect the consumption of bromine and chlorine. In this case, it may be necessary to adjust the dispenser to a higher dosing setting.

Water volume (US Gallons)	Water volume (L / m ³)	Dosing opening (for chlorine)	Dosing opening (for bromine)
< 250 gal	< 1000 L (1 m ³)	1 	2 
From 250 gal to 500 gal	From 1000 L to 2000 L (1-2 m ³)	2 	3 
From 500 gal to 1050 gal	From 2000 L to 4000 L (2-4 m ³)	3 	5 
> 1050 gal	> 4000 L (4 m ³)	4 	5 

* The dissolving rate is indicated by the number of holes at the bottom of the tube.
